Test Case ID	Module	Test Scenario/Objective
TC001	Admin	Admin login with valid username and pasword
TC002	Admin	Verify admin dashboard details
TC003	Admin	Verify admin able to add new user

TC004	Admin	Verify admin able to add new user ESS
TC005	Admin	Verify admin able to update existing users
TC006	Admin	Verify admin able to search the user - using username
TC007	Admin	Verify admin able to search the user - using employee name
TC008	Admin	Verify admin able to delete the existing users

TC009	Admin	Verify mandatory fields validation
TC010	Admin	Verify admin can view employee timesheet
TC011	Admin	Verify admin can approve employee timesheet
TC012		Verify admin can reset employee timesheet
TC013	Admin	Verify admin can reject employee timesheet

TC014	Admin	Verify admin can view employee attendance
TC015	Admin	Verify admin can configure attendance
TC016	Admin	Verify admin can view attendance report
TC017	Admin	Verify admin can view Employee Project Report
TC018	Admin	Verify admin can view Employee Project Report
TC019	Admin	Verify admin can view projects information

TC020	Admin	Verify admin can view customer information
TC021	Admin	Verify admin can add projects information
TC022	Admin	Verify admin can add customer information
TC023	Admin	Verify admin can set KPI for employees
TC024	PIM	Verify employee contact details can be added

TC025	PIM	Verify employee emergency contact can be added
TC026	PIM	Verify employee emergency contact can be updated
TC027	PIM	Verify employee emergency contact can be deleted
TC028	PIM	Verify employee dependant can be added
TC029	PIM	Verify employee dependant can be updated
TC030	PIM	Verify employee dependant can be deleted

TC031	PIM	Verify employee immigration records can be added
TC032	PIM	Verify employee job details can be added

TC033	PIM	Verify contract details of employee can be added
TC034	PIM	Verify employee termination
TC035	PIM	Verify employment reactivation

TC036	PIM	Verify employee salary details can be added
TC037	PIM	Verify employee salary details can be updated
TC038	PIM	Verify employee salary details can be updated
TC039	PIM	Verify mandatory fields validation - salary
TC040	PIM	Verify admin can view and search employee

TC041	PIM	Verify employee contact photo update
TC042	PIM	Verify employee report creation
TC043	PIM	Verify employee report updation
TC044	PIM	Verify employee report deletion
TC045	PIM	Verify employee login
TC046	Employee dashboard	Verify employee dashboard

TC047	Leave management	Verify employee able to apply leave
TC048	Leave management	Verify employee able to view leave list
TC049	Leave management	Verify employee leave report
TC050	Timesheet	Verify employee able to book timesheet
TC051	Timesheet	Verify employee able to edit timesheet
TC052	Timesheet	Verify employee able to enter attendance
TC053	Timesheet	Verify employee can log in/out time

TC054	Performance	Verify employee able to view the reviews
TC055	Performance	Verify employee able to view performance trackers
TC056		Web based navigation
TC057		Verify application demo available and can be accessible all time
TC058		Verify account get locked after multiple login attempts

TC059		Verify the users can reset the password using forgot password
TC060		Verify the user login with invalid credentials

Pre-Requisite	Steps to Reproduce
Web application should be opened in the browser	1. Navigate to login page 2. Enter valid user name - Admin 3. Enter valid password - admin123 4. Click on login
Web application should be opened in the browser	1. Navigate to login page 2. Enter valid user name - Admin 3. Enter valid password - admin123 4. Click on login 5. Verify dashboard details Time at Work My Actions Quick Launch Buzz Latest Posts Employees on Leave Today Employee Distribution by Sub Unit Employee Distribution by Location
Web application should be opened in the browser	1. Click on add user 2. Enter user role "Admin" 3. Enter employee name "John" 4. Enter user name "Bishiu" 5. Enter status "Enabled" 6. Enter password "Admin@123"

Web application should be opened in the browser and login using valid admin credential	1. Click on add user 2. Enter user role "ESS" 3. Enter employee name "Peter Mac Anderson" 4. Enter user name "Bindhu" 5. Enter status "Enabled" 6. Enter password "Ess@123"
Web application should be opened in the browser and login using valid admin credential	1. Click on edit user icon 2. Click on Change password 3. Enter new password 4. Click on save
Web application should be opened in the browser and login using valid admin credential	1. Enter user name 2. Click on search
Web application should be opened in the browser and login using valid admin credential	1. Enter employee name 2. Click on search
Web application should be opened in the browser and login using valid admin credential	1. Click on delete icon 2. Click on "Yes delete user" from popup

Web application should be opened in the browser and login using valid admin credential	1. Click on add user 2. Enter user role "ESS" 3. Enter employee name "Peter Mac Anderson" 4. Enter user name "@1234" 5. Enter status "Enabled" 6. Enter password "Ess4@123"
Web application should be opened in the browser and login using valid admin credential	1. Click on Time 2. Click on timesheet 3. Enter employee name 4. Click on search
Web application should be opened in the browser and login using valid admin credential	1. Click on Time 2. Click on timesheet 3. Click on employee "mike ramsay" 4. Click on approve
Web application should be opened in the browser and login using valid admin credential	1. Click on Time 2. Click on timesheet 3. Click on employee "mike ramsay" 4. Click on reset
Web application should be opened in the browser and login using valid admin credential	1. Click on Time 2. Click on timesheet 3. Click on employee "mike ramsay" 4. Click on reject

Web application should be opened in the browser and login using valid admin credential	1. Click on Time 2. Click on Attendance 3. Click on employee records 4. Enter employee name "Dikoy" 5. Enter date "2026-26-10"

Web application should be opened	1. Enter user name "Vijay" 2. Click on forgot password 3. Enter user name "Bikoy"
Web application should be opened	1. Click on employee login 2. Enter invalid user name " XTY" 3. Enter invalid password "232"

Test Data	Expected Result
Admin credential: Username - Admin password - admin123	User should be successfully logged in and redirected to dashboard
Admin credential: Username - Admin password - admin123	Employee should able to view dashboard details
Admin credential: Username - Admin password - admin123 Employee details ---------- User role "Admin" Employee name "John" User name "Bishiu" Status "Enabled" Password "Ess@123"	Admin should able to add new user and "employee successfully saved" message should be displayed

Admin credential: Username - Admin password - admin123 Employee details ---------- User role "ESS" Employee name "Peter Mac Anderson" User name "Bindhu" Status "Enabled" Password "Ess@123" User role "ESS" Employee name "James Butler" User name "Rajani" Status "Enabled" Password "Ess2@123"	Admin should able to add new user and "employee successfully saved" message should be displayed
User role "ESS" Employee name "James Butler" New password ---------- Ess@12345!	Admin should able to edit the existing user details and able to see successfully updated message
User name : Bindhu	Admin should able to view the employee details
employee name - Peter Mac Anderson	Admin should able to view the employee details
User name : Bindhu	Admin should able to see successfully deleted message

User role "Ess" Employee name "John1231" User name "@1234" Status "Enabled" Password "Ess4@123"	Employee name, user name should not accept any numbers or special characters
employee "mike ramsay"	Employee timesheet should be viewed
employee "mike ramsay"	Employee timesheet should get approved with success message and timesheet status changed to "approved"
employee "mike ramsay"	Employee timesheet should be reset to submitted
employee "mike ramsay"	Employee timesheet should get rejected with success message and timesheet status changed to "rejected"

employee name "Dikoy" date "2026-26-10"	Employee attendance should get displayed
	Employee attendance should get configured
employee name "Mike"	Employee attendance summary should be viewed
employee name "Mike"	Employee project reports should be viewed
project name "Freewave technologies"	Project reports should be viewed
	All existing project should be viewed

	All existing customers should be viewed
name "Salesforce" Customers name"Apache"	New project should be added with success message
name "Dell"	New customer should be added with success message
Key Performance Indicator "Automation" job title "QA tester" minimum rate "15" maximum rate "25"	New KPI should be added and success message is displayed
Street 1 "Brindley road" City "Manchester" State/Province "Greater manchester" Zip/Postal Code "M12 GN" country "United kingdom" mobile number "05634564324" email "work@orange.com"	Admin should able to see successfully saved message

Name "Jia" relationship "Mom" mobile "03432345343"	Admin should able to see successfully saved message
Name "Roman" relationship "Brother" mobile "07874673827"	Admin should able to see successfully updated message
Name "Roman" relationship "Brother" mobile "07874673827"	User emergency details should be successfully deleted
name "Kia" relationship "Child" DOB "23062023"	User dependent should be added and successfull message should be displayed
DOB "23062025"	User dependent should be updated and successfull message should be displayed
	User dependant should get deleted successfully

Visa Number "V1234567" Issued Date "23012020" Expiry Date "23012020" Eligible Status "Active" Issued By "UK" Eligible Review Date "23012020" comments "Active status"	User immigration status should get added
Joined Date "20180313" job title "Automation tester" Job Category "Proffessional" sub unit "engineering" Location "Texas" Employment Status"Full time permanent"	User job details should get added

Employee name "Carol" Joined Date "20180313" job title "Automation tester" Job Category "Proffessional" sub unit "engineering" Location "Texas" Employment Status"Part time contract" Contract Start Date "20180314" Contract End date "20250314" Attach file "contract.doc"	User job details should get added
Employee name "Carol" termination date "20250314" termination reason "Contract not renewed"	Employee termination should be updated in the system with success message and status updated as past employee
Employee name "Carol"	Employee employment status should get activated

Salary Component "Current" currency "Pound sterling" Account Number "23432123" Account Type "Saving" Routing Number "2333" Enter Amount "80000"	Employee salary should be added and able to see success message
currency "Pound sterling" Account Number "78432123" Enter Amount "70000"	Employee salary should be updated and able to see success message
Employee name - Amit	Employee salary should be deleted and able to view the message
Salary "Werw	Error message should be displayed
Employee name "Rithu" Job titile "QA lead"	User details should be displayed

	Contact photo should get added
Name "Employee immigration " display group "Immigration" display field "Number"	Employee reports should be created and success message should be displayed
Name "Employee immigration " display group "Immigration" display field "Number"	Employee reports should be updated and success message should be displayed
Name "Employee immigration "	Employee reports should be deleted and success message should be displayed
Username - Suriya password - Testemp1@123	User should be successfully logged in and redirected to dashboard
Username - Suriya password - Testemp1@123	Employee should able to view dashboard details

Username - Suriya password - Testemp1@123	Employee should able to apply for leave
Username - Suriya password - Testemp1@123	Employee leave list should be displayed
Username - Suriya password - Testemp1@123	Employee leave report for the given time period should be displayed
Project "Freewave tech" Activity "Feature development" day effort "8"	Employee time sheet should be submitted and success message should get displayed
Project "Freewave tech" Activity "bug fix" day effort "9"	Employee time sheet should be submitted and success message should get displayed
date "26102026"	Employee should able to view attendance records
date "26102026" in time "6.25 AM" out time "6.25AM"	Employee should able to add in time and out time and they should be different

Username - JIa password - Testemp2@123	Employee should able to view reviews
Username - JIa password - Testemp2@123	Employee should able to view Performance Trackers
user name "Suriya" password "Testemp1@123"	User should navigate through the brower intuitively
user name "Suriya" password "Testemp1@123"	Application demo should be available and can be accessible all time
	User account should get locked after multiple login attempts

	User should receive password reset link via email or text message
Username : "XTY" Password : "232"	User should get prompted with valid error message. "I

Actual Result	Status	Defect id
Admin logged in and redirected to dashboard	Pass	
Employee is able to view the dashboard	Pass	
New user is added and saved to the system	Pass	

New user is added and saved to the system	Pass
User details is successfully updated and message is displayed	Pass
User detail is displayed	Pass
User detail is displayed	Pass
User is deleted from the system	pass

Special characters are getting accepted in employee and user name fields	Fail	Bug 01
Employee timesheet is viewed	Pass	
Employee timesheet is approved with success message and timesheet status change to "approved"	Pass	
Employee timesheet is reset to submitted	Pass	
Employee timesheet is rejected with success message and timesheet status change to "rejected"	Pass	

Employee attendance is displayed	Pass
Employee attendance is configured	Pass
Employee attendance is viewed	Pass
Employee project report is viewed	Pass
Project report is viewed	Pass
All existing project is viewed	Pass

All existing customer is viewed	Pass
New project is added with success message	Pass
New customer is added with success message	Pass
New KPI is added and success message is displayed	Pass
User personal details are saved	Pass

User emergency contact details are saved	Pass
User emergency contact details are updated	Pass
User emergency contact details are deleted	Pass
User dependant is added	Pass
User dependant is updated	Pass
User dependant is deleted	Pass

User immigration status is added	Pass
User job details is added	Pass

User job details is added	Pass
Employee termination is updated in the system and status set as past employee	Pass
Employee employement status is activated	Pass

Employee salary is added and success messag is displayed	Pass
Employee salary is updated and success message is displayed	Pass
Employee salary is deleted and able to view the message	Pass
Error message is displayed	Pass
User information is displayed	Pass

Contact photo is added	Pass
Employee reports is created and success message is displayed	Pass
Employee reports is updated and success message is displayed	Pass
Employee reports is deleted	Pass
Employee is successfully logged in	Pass
Employee is able to view the dashboard	Pass

Employee not able to apply for leave	Fail	Bug 02
Employee leave list is viewed	Pass	
Employee leave report is viewed	Pass	
Employee time sheet is submitted and success message is displayed	Pass	
Employee time sheet is submitted and success message is displayed	Pass	
Employee attendance record is viewed	Pass	
Employee in / out time accepting same values	Fail	Bug03

Employee is able to view the reviews	Pass
Employee is able to view Performance Trackers	Pass
User able to navigate intuitively	Pass
Application demo available all time	Pass
User account is locked after attempt fails	Pass

Mail reset link is received	Pass
User get prompted with proper message	Pass
